

## Durable

FlexGlass® is available in sizes up to 8.25ft tall by 100ft long and engineered from the same materials as bullet proof glass. That makes FlexGlass an extremely large & durable screen well suited for use in any scenarios where rear-projection is applicable. It is also perfectly compatible with short throw projection from any direction, making a massive screen possible, with a very small footprint.

## Flexible

Stop buying rigid panel, glass rear-projection screens! With FlexGlass, you can configure your screen into many different shapes such as an S-Shape or even a 360° circle due to its flexible nature. Even with all that flexibility, FlexGlass still maintains that look we all know and love from standard glass rear-projection systems. It really is the best of both worlds.

FlexGlass .6

Max Width	1212" (30785m)
Max Height	103" (2616mm)
Gain	.6
ALR	60%
Half Gain	75°
