

Pure Standard

## 4K+ and Beyond.

Pure White and Gray projection screens feature our proprietary micro texture that is 9 times finer and smoother than standard white and gray materials. When you buy a Pure screen, you can rest assured your purchase is future proof, capable of accurately and uniformly repeating resolutions even up to 8k and beyond with no negative effects.

## Ultra-wide Viewing Angle.

Pure White and Gray boasting very significant half gains of 75° and 80° respectively. This makes Pure an excellent solution for light controlled rooms with off-axis viewing positions.

## Flexible.

Thanks to its flexible chemical makeup, Pure can roll tightly and even tightly stretched when necessary. That means we can utilize it in a lot of unique applications such as Zero-G®, Transformer®, and Zero Edge®. There is also the added benefit of being able to roll it on a small core for shipping simplifying logistics challenges.

Max Width	3600" (91440mm)	
Max Height	102" (2590mm)	
Max Diagonal	222" (5639mm) in 16:9	
Gain	.85	1.3
ALR	15%	10%
Half Gain	80°	75°
Minimum Throw	0.2 x Image Width	
Projection Type	Front Only
