

Your Projector Goes Here

A New Form of ALR.

Think window blinds, barely opened. The downward facing louvre is exactly the shape you would see if you cut a cross section of our ST screen, and examined it with a microscope. Our ST material rejects above, and even direct ambient light while only accepting light from directly below.

Short Throw (ST) .6

Ultra-Wide Viewing Angle.

With a nearly perfect viewing cone of 170 degrees, our ST screen is capable of being viewed from extreme off axis positions. This makes it perfect for commercial environments, large living and family rooms, and everything in between.

Max Width	113" (2946mm)
Max Height	59" (1498mm)
Gain	.6
ALR	90%
Half Gain	85°
Minimum Throw	0.1 x Image Width
Projection Type	Front Only (Ultra-Short Throw)

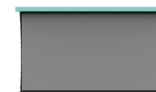

ALR From Above & Out.

By rejecting ambient light from directly above, and perpendicular to the screen, ST accurately reproduces bright, colorful images, and maintains the contrast of the projector. The result is an over **700% increase in contrast** compared to matte white screen materials.
